

Preliminary Agenda – 2025 Energy Innovations: LDC Gas Forums Rockies & West

<u>Monday, Aug. 11, 2025</u>	<u>Session name, description and speakers</u>
3:00 pm – 3:20 pm	Networking with the Industry: Registration
3:20 pm – 3:30 pm	Welcome & Overview: Christy Coleman, Vice President, LDC Gas Forums
3:30 pm – 3:45 pm	Opening Remarks: Speaker: Dan Haley, Executive Director, Coloradans for Responsible Energy Development
3:45 pm – 5:00 pm	Opening Keynote & Fireside Chat With Dan Haley: Energy, Climate, Poverty and Prosperity Food, shelter, education, health and wellbeing - none of these are possible without energy, and the quality of each depends on the degree of access to affordable, reliable, and secure energy. While access to energy does not guarantee a path out of poverty, there is no path out of poverty with access to energy. We will examine the history of the global energy mix, the disparity in energy access around the world, and the complexities that come with balancing the competing priorities of abundance/reliability, affordability and impact. Speaker: Ron Gusek, CEO, Liberty Energy
5:00 pm – 7:00 pm	Monday Evening Attendee Welcome Reception (Located in Horace Tabor & Molly Brown Foyer)
<u>Tuesday, August 12, 2025</u>	
7:15 am - 8:15 am	Networking with the Industry: Registration and Continental Breakfast
8:15 am - 8:30 am	Welcome & Overview: Christy Coleman, Vice President, LDC Gas Forums
8:30 am - 9:00 am	Keynote Breakfast: The Tides Have Turned: A Bold Future for Natural Gas The natural gas industry has long weathered the tides of market change — rising, falling, and rising again. But today, we are no longer navigating normal waters. The familiar rhythms have given way to a new era of disruption and opportunity. We stand on the brink of a transformation unlike anything this industry has seen in our lifetime. Speaker:

	Scott Johns , <i>Chief Commercial Officer</i> , Sapphire Gas Solutions
9:00 am – 10:30 am	Panel: It's All in The Numbers: Rockies & West Market Fundamental Analysis, Interpretation, Forecasts and Takeaways This Panel conducts a comprehensive overview of up-to-the-minute U.S. natural gas market conditions, with a particular focus on the Rockies and West region. The Panel is comprised of industry subject matter experts, not only setting out fundamental data, events and forecasts, but more importantly providing insightful analysis and actionable takeaways. Topics addressed include: • Supply / Demand: current balances; forecasts by segment (utility, industrial, Petrochem; LNG, gas-fired powergen) • Key Influences: impact of AI Data Center demand on gas-fired powergen; LNG Exports; Weather • Midstream infrastructure considerations • Forecasts: pricing; operations; volatility assessment Insights provided by this Panel serve as an excellent foundation and factual reference point for the overall Forum agenda and ensuing discussions. Moderator: Michael Porter, <i>VP West Origination</i>, bp Speakers: Jay Bhatti, <i>CEO & Founder</i>, NatGasHub.com Chet Sharma, <i>Natural Gas Analyst</i>, DRW Dan Spangler, <i>Senior Director, Analytics</i>, Natural Gas Intelligence
10:30 am – 11:00 am	Networking Break
11:00 am - 12:15 pm	Panel: Speed to Market For New Data Center Development - Winning The AI Arms Race A tsunami of demand for development of new data Centers to support AI is clearly upon us. This is a global phenomenon with many capable players pursuing the same goal. The U.S. must succeed in this AI Arms Race by quickly capturing an appropriate market share. This Panel will examine the key criteria involved in expediting the creation of new Data Centers, including stakeholder considerations, project funding and development, siting requirements, new infrastructure development, supply chain, policy/regulatory, etc. Of particular interest to this audience are considerations around accessing the extraordinary quantities of reliable electric power (utility/grid power vs. behind-the-meter on-site power), and why natural gas has emerged as the preferred fuel to generate the incremental electricity required. Potential for lower carbon, clean energy characteristics of the natural gas fuel is another consideration (RNG, Certified Gas, etc.). The discussion will address the interest of a range of existing stakeholders spanning the value chain, as well as new entrants to the world of natural gas fueled electricity. Moderator: Rock Graham, <i>Manager Origination</i>, NRG Energy Speakers: Trenton Thornock, <i>CEO</i>, Prometheus Hyperscale

	Alicia Summers , <i>Chief Development Officer</i> , Frontier Infrastructure Ty Harrison , <i>President and CFO</i> , PureWest
12:15 pm - 12:45 pm	Board Bus & Depart for Optional Afternoon Networking Activity
12:45 pm – 4:15 pm	Experience Golden’s Rich History & Flavor!
4:15 pm – 6:15 pm	Cocktail Reception-Hosted by the Sponsors Please join our hosts, the Corporate Sponsors, at a cocktail reception in your honor. Don’t make your dinner plans too early as hors d’oeuvres and an open bar will be the highlight of this extremely well attended session!
<u>Wednesday, August 13, 2025</u>	
7:15 am - 8:15 am	Networking with the Industry: Registration and Continental Breakfast
8:15 am - 8:20 am	Welcome & Overview: Christy Coleman , <i>Vice President</i> , LDC Gas Forums
8:20 am – 9:00 am	Opening Keynote: North America natural gas – will demand match production? Natural gas rig counts and production are growing in anticipation of increasing demand, but summer demand has not matched the increase leading to high storage levels. How will the market balance? We will discuss the recent winter season, and how the summer season is shaping up. We will touch on high level themes including weather, LNG, coal, and renewables that will influence the market this season and into the future. Speaker: James Pearson , <i>Sr. Market Analyst</i> , ConocoPhillips
9:00 am – 10:15 am	Panel: Where There's A Need, There's A Solution - Innovative Technology Solutions To Improve The Bottom Line Across The Natural Gas Commercial Value Chain This Panel is composed of industry experts from a variety of energy technology providers offering innovative solutions to challenges across the natural gas commercial value chain. With the recent resurgence in demand for natural gas as a vital energy source, attention turns to ensuring optimal supply and delivery infrastructure to efficiently and securely move energy from production sources to demand centers. The Panel will explore best practices for technology utilization, as well as identify specific case studies where technology solutions have been deployed to successfully solve various operational and commercial challenges. Specific technology solutions include: • Energy trade and transaction management, managing the entire natural gas lifecycle within a single platform • A comprehensive all-in-one software solution that enables natural gas businesses to productively and profitably manage their wholesale and retail business operations from wellhead to pipeline to city gate to meter

	• A cost-effective and data-driven solution for natural gas professionals and industry participants seeking price transparency and actionable market intelligence Moderator: Ken Fung, <i>Manager Origination</i>, NRG, Energy Speakers: Scott Vogan, <i>SVP Sales & Marketing</i>, Trellis Energy Mark Lloret, <i>Principal Advisor</i>, nGenuie Larry Loocke, <i>Partner</i>, capSpire, Inc
10:15 am - 10:45 am	Networking Break
10:45 am – 12:15 pm	Panel: Where The Buck Stops - Gas Buyer Insights: Market Conditions; Opportunities/Challenges; Gas Buying Strategies End users of natural gas include Gas Distribution Utilities (LDCs); Power Generation (Utility & IPP); Industrials (process & heat). Entities include publicly owned and municipal utilities (subject to regulation), as well as private non-regulated businesses (now including AI Data Centers – both on the utility/grid as well as behind-the-meter utilizing on-site self-generated power). Gas Buyers for these entities have a unique perspective on the market, given their unique location at the end of the value chain, their dependence on natural gas supply, and an absolute requirement to meet the demand of their customers. Creative negotiation of commercial terms for gas supply is crucial to their business to ensure security of supply, operational flexibility and competitive pricing. In addition, the regulated entities must do all this while managing the complexities of regulatory oversight and passthrough of gas supply costs in published rates. The Panel is comprised of a diversity of Gas Buyers, offering a range of valuable perspectives and insights. Panelists will provide viewpoints, considerations, and takeaways on the following topic categories: • Market Fundamentals (supply; demand; pricing) • Gas Supply Buying Strategies (agreement structuring & preferences) • Midstream Infrastructure Considerations • Implications of Competing Demands For Gas Supply • Gas Electric Coordination • Regulatory & Policy • Technology Moderator: Cleve Hogarth, <i>Principal</i>, Cleveland Advisory LLC Speakers: Steve Wall, <i>Manager Gas Supply</i>, Enbridge Gas Michael Krutak, <i>Principal Gas Planner</i>, Vantage Data Centers Ray Sasaki, <i>Director - Gas Acquisition</i>, SoCalGas Alan King, <i>Vice President</i>, PBF Energy
